When incorporating online resources into teaching, it is important to:

- understand that online materials are protected by **copyright laws** and one must seek permission before using them.
- ensure the **safety** of online sites,
- avoid **plagiarism** by properly citing and acknowledging sources of online content.
- discourage **piracy** by encouraging learners to avoid unauthorised use of other's works
- Uphold **ethical standards** by maintaining integrity and moral responsibility in the use of online resources.

Education is becoming more accessible to all, thanks to **Open Education Resources (ORE)** and **Kenya Education Cloud** which provide freely, available and openly licensed materials. These sites are crucial for use in teaching because;

- they reduce the cost of education since the materials are free for use
- they expand access to high quality of education materials globally
- promotes knowledge sharing among our learners

Furthermore you can also visit TV lessons on EDU channel where online classes are conducted

When collecting online music resources, you should:

1. decide on the music resource they require
2. acquire a digital device connected to internet
3. identify a safe site to collect the resource
4. create a folder in the storage device and name it
5. create a file in the folder and name it
6. download the resource
7. save the downloaded resource in the file
8. save the folder
